A new Multi-Modal Transport Hub for Castle Douglas

Dumfries and Galloway Council is developing nine multi-modal transport hubs throughout the region with funding from the UK Government's Levelling Up Fund.

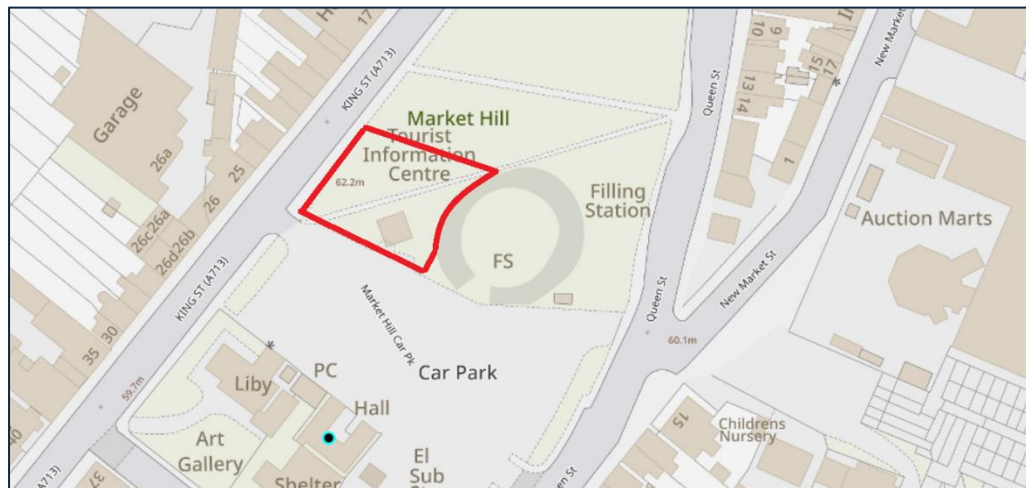

What is the purpose of the hubs?

The hubs aim to make sustainable and active travel more accessible to residents and visitors by joining up everyday journeys, improving links between towns and reducing car trips while increasing bus, walking, and cycling trips, and boosting visitor numbers.

There are many benefits from switching to sustainable and active forms of travel:

- People choosing active forms of travel like walking, wheeling and cycling can save money
- Active travel also boosts health and wellbeing
- Communities benefit from being better connected
- Businesses benefit when people “stop and shop”
- Everyone benefits from reduced congestion and pollution

Where will the Castle Douglas hub be?

The hub will be located on Market Hill.

**Funded by
UK Government**

What will be in the Castle Douglas hub?

- Public cycle pump and repair station
- Secure cycle storage lockers
- Electric cycle storage lockers with internal charging points
- Electric hire bikes
- Bike and dog wash
- Car club hire car parking bays (an existing EV charging bay will be utilised)
- Improved community space

Please note that plans are still under development and any proposed building would require applications for statutory planning permission.
