A new Multi-Modal Transport Hub for Langholm

Dumfries and Galloway Council is developing nine multi-modal transport hubs throughout the region with funding from the UK Government's Levelling Up Fund.

What is the purpose of the hubs?

The hubs aim to make sustainable and active travel more accessible to residents and visitors by joining up everyday journeys, improving links between towns and reducing car trips while increasing bus, walking, and cycling trips, and boosting visitor numbers.

There are many benefits from switching to sustainable and active forms of travel:

- People choosing active forms of travel like walking, wheeling and cycling can save money
- Active travel also boosts health and wellbeing
- Communities benefit from being better connected
- Businesses benefit when people “stop and shop”
- Everyone benefits from reduced congestion and pollution

Where will the Langholm hub be?

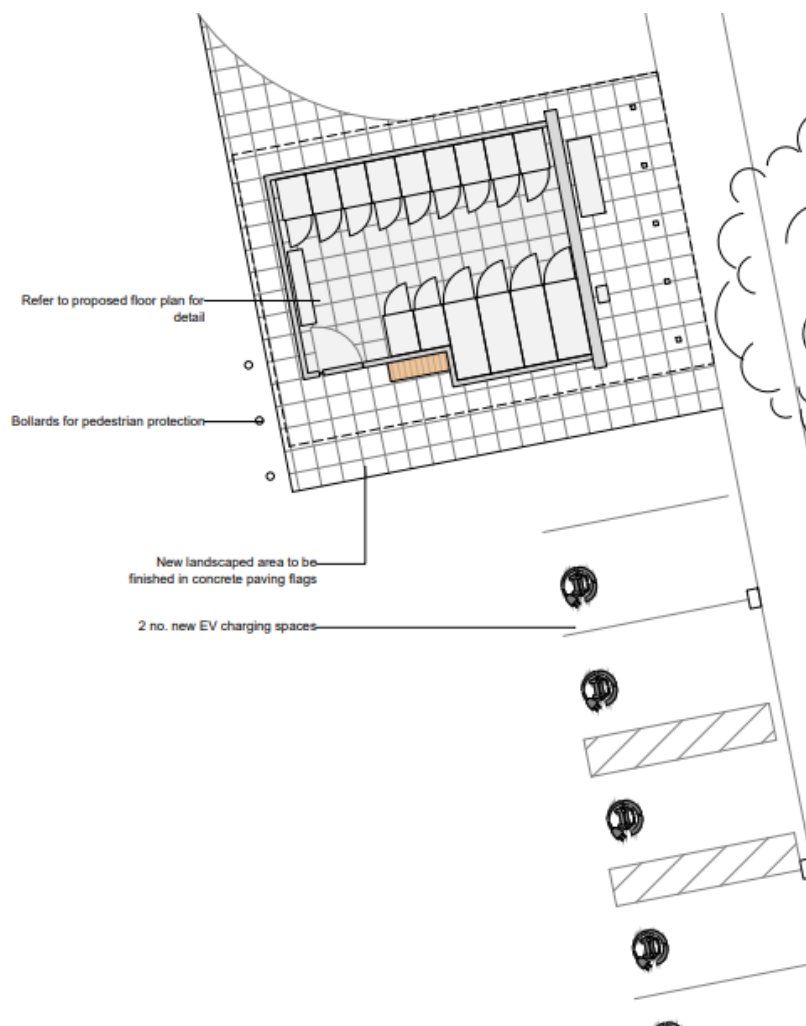

The hub will be located in Kilngreen car park.

Funded by UK Government

What will be in the Langholm hub?

- Public cycle pump and repair station
- Secure cycle storage lockers
- Electric cycle storage lockers with internal charging points
- Bike and dog wash
- Car club hire car parking bays with EV charger
- Electric Vehicle Charging points

Please note that plans are under development. For further information, please contact LUFtransport@dumgal.gov.uk
